

# The 21st Century COE Program Wind Effects on Buildings and Urban Environment

## Recruiting Postgraduate students (Architectural) Willing to join

## The 21st Century COE Program Wind Effects on Buildings and Urban Environment

### Introduction to the Program

Research will be conducted at the Wind Engineering Research Center in Tokyo Polytechnic University from August 2003 to March 2008, in various areas on the following themes.

- **Wind Hazard Mitigation**
- **Design Method for Natural / Cross Ventilation**
- **Air Pollution and its Assessment System**

The Wind Engineering Research Center will also play a core role in research and educational contribution to the APEC countries.

### Guidelines for Applicants

#### ➤ **Qualification Requirements**

Master's degree, or expectation of taking Master's degree by March 2006.

#### ➤ **Privilege**

Full support of admission fee & course fee, and employment as a research assistant during the COE project period. As for the employment after the COE project, contact on the supervisor. (JPY¥45,000 will be required for the examination fee.)

#### ➤ **Examination Schedule**

<b>1st stage</b>	:	Application	undecided
		Examination	undecided
		Test results	undecided
<b>2nd stage</b>	:	Application	undecided
		Examination	undecided
		Test results	undecided

#### ➤ **Judging System**

Documentary examination.
